Objective

I am a self-motivated, hardworking, and disciplined student in my junior year of college with a strong passion for software-engineering. I'm looking to put my programming skills to use in a professional setting and learn from any challenges that I face along the way. An internship at your company would mean that I get the opportunity to work alongside some of the brightest minds in the industry and further hone my skills as an aspiring software engineer all the while helping your company reach its desired objectives.

Education

B.A COMPUTER SCIENCE | 2021-PRESENT | CUNY QUEEN'S COLLEGE

• **Related coursework:**

- Data Structures
- Database Systems
- Analysis of Algorithms

Projects

EMPLOYEE LIST: I wrote a comprehensive program that keeps track of a list of employees and gives the user the ability to hire, lay off, search for, and rehire employees by implementing the following data structures: Linked Lists, Stacks, Queues, and Binary Search Trees.

ATM MACHINE: An object-oriented Java program that allows the user to create an account and log in using a username and password combination and gives the user the ability to deposit, withdraw, and transfer money into their checking or savings account.

Programming Languages

1. Java
2. SQL / MySQL
3. HTML
4. CSS
5. JavaScript

Past Experiences

Dance Instructor (2016-Present)

- Offered one-on-one instruction to students by appointment.
- Planned, prepared, and delivered lesson plans introducing students to dance techniques.
- Planned and oversaw group, couples, and individual dance programs.
